

INTELLIGENCE ON-DEMAND

CRITICAL INSIGHTS, TRAINING & RESEARCH

READILY AVAILABLE AND FLEXIBLE FOR YOUR NEEDS

According to a [2024 ISACA](#) report sponsored by Adobe, 66% of cybersecurity professionals say their role is **more** stressful now than it was five years ago, citing a complex threat landscape and insufficient training as the primary causes of burnout, and with it the inevitable loss in productivity and increased risk levels.

Intelligence On-Demand gives you the opportunity to leverage our team's combined 125+ years of threat hunting experience to obtain priority IOFA intelligence updates, tailored threat briefings, individualized reports and advanced training and research, that rapidly increases your ability to detect and block known and hidden infrastructure.

- Led by a former leader in the United States Intelligence Community, we deliver more ways to enable you make better informed decisions faster.
- Lighten your security load by reallocating key research tasks, reassigning staff for critical duties.
- Plan your options well in advance with a cyber intelligence roadmap to drive efficiency.
